

Accessories ADHT/ PM1000/ PM8000

- High temperature pressure adapter
- Panel meter
- Plug-in display

DESCRIPTION

The ESI product range includes high quality accessories in order to grant users the optimal installation solution in all applications.

The ADHT Cooling Coil Adaptor provides thermal isolation for a pressure transducer from hot liquid or gas media.

It is an ideal solution for applications where the media temperature exceeds the rating of a pressure transducer or transmitter. The Cooling Coil adapter will reduce the temperature of the media by approximately one fifth before it makes contact with the transducer sensing element. The ADHT can be used with media up to 200°C and with pressure ranges up to 400bar max. Constructed entirely from 316L stainless steel, it offers a simple yet effective solution to high temperature applications when used with ESI pressure sensors.

PM1000

The PM1000 series is a 4 digit LED plug-on display for use with transmitters with 4-20 mA 2 wire output and fitted with DIN 43650 connector. It provides a local display for a multitude of applications.

The plug-on display simply fits between the transmitter plug and connecting cable socket and is powered from the 4-20mA current loop signal of the transmitter. No additional power source is required.

PM8000

The PM8000 Series digital panel meters are easy to set up and commission, whilst offering extremely high precision and long term reliability.

A MENU-FREE calibration system is employed with this panel meter design. This makes calibration and set-up of operating parameters very straightforward and radically simplifies this process compared with the usual menu arrangement used on most digital meters.
